ABOUT ME

I work as a front-end developer with over 4+ years of great experience. I follow the latest and best ways in this field because it is one of my favorite areas and keep up with everything that is new. I can convert a design from scratch into a highly dynamic and responsive website with all screens, and not only that, but there are animated graphics according to the customer's request, whether it is landing pages or an e-commerce site, or even simple modifications to existing sites, and in addition to that I can deal with API and I took it from back-end developer and showed it on the site with complete professionalism.

Services

- Developing modern user interfaces using HTML, CSS, JavaScript, ReactJS, and Next.js.
- Enhancing user experience with fast, seamless access to content and smooth navigation.
- Building fully responsive web applications that perform well across all devices.
- Creating dynamic, interactive websites for enhanced user engagement.
- Expertise in working with Git and GitHub for version control and collaboration.
- Managing projects effectively and working closely with development teams to meet goals.

Education

Port Said University, Computer Science

- **Coursework:** Computer Architecture, Artificial Intelligence, Comparison of Learning Algorithms, Computational Theory

Projects

My personal website

www.elshobaky.com

- This is a site for displaying my work, and it has many wonderful features. I used the react framework in it and worked on the smallest details in it to make it look in the best condition, and everything in it works perfectly.

Movie website with fetch API

www.MoviesWeb.com

- This is one of the best sites you can watch because it has a lot of great ideas and modern technologies and it is a site that responds to all different screen sizes I used API by using Axios to get movies and also used local storage and session storage to store data such as account when login and lists. And in the end, I hope you like the site.

Seamless User Experience and Advanced E-Commerce Features

www.concord.com

- This e-commerce site for electronic products exemplifies high skill in frontend development. The site features a seamless user experience with intuitive navigation, showcasing products effectively. Key functionalities include a robust payment gateway, product integration, and user-specific access (e.g., for buyers and sellers). The site also includes a shopping cart for easy purchasing. These features mirror those of leading platforms like Amazon, enhancing usability and boosting sales.

Food products factory website

www.sky-food.com

- Sky Food offers a sleek, user-centric design that highlights high-quality food products. The site features intuitive navigation, vibrant product displays, and multi-language support, enhancing overall usability. It integrates product information seamlessly and provides easy access to the company's history and contact details, showcasing advanced development skills.

Agency platform

www.Solo.com

- As a passionate and innovative frontend developer, I bring a unique blend of creativity and technical expertise to the digital landscape. My work at a leading Digital Creative Agency showcases my ability to craft visually stunning and highly interactive websites. I specialize in implementing smooth and captivating animations that enhance user engagement and make every interaction memorable.

With a keen eye for design and a deep understanding of user experience principles, I create intuitive, responsive, and aesthetically pleasing interfaces that not only look great but also function flawlessly. My skill set includes advanced knowledge of HTML, CSS, JavaScript, and modern frameworks, allowing me to bring complex design concepts to life with precision and creativity.

I am dedicated to pushing the boundaries of what's possible in web design, constantly exploring new technologies and techniques to deliver cutting-edge digital experiences. My commitment to excellence ensures that every project I work on meets the highest standards of quality, innovation, and user satisfaction.

Creating a User-Friendly, Multi-Language Platform for Food Lovers

www.syriangourmet.com

- This website showcases a food restaurant and store, designed with a focus on enhancing user experience and increasing company sales. As a frontend developer, I implemented a multi-language feature to cater to a diverse audience, ensuring accessibility and ease of use. The site seamlessly integrates product displays and food recipes, providing a visually appealing and intuitive navigation. These elements not only improve user interaction but also drive engagement and sales.

eCommerce Website

www.BlackFriday.com

- This is a site in which I used a lot of great features, whether it was responsive with all the different sizes. It also has a login page, shopping cart, product detail view page, and search bar, and it has a lot of interactive buttons that give an excellent user experience.

Landing page using react

www.taxpal.com

- This is a simple, responsive, and effective project for the user.

covid-19 platform

www.covid19.com

- This is a nice project and features great interactions with the user, multitasking and speed with the user, and lots of icons that are consistent with the web page.

Statistics and data analysis site

www.Statistics.com

- This is a big and beautiful project for a website for Statistics.
